

Mergers & Acquisitions

Saiber has a long history of representing clients in connection with complex merger and acquisition transactions. We regularly counsel public and private businesses in all aspects of negotiated M&A transactions, including stock acquisitions, asset acquisitions, mergers, joint ventures and divestitures. We are experienced in representing both acquiring and target companies, working closely with shareholders and senior management to close deals in a timely and cost effective manner.

Our attorneys represent businesses in a broad spectrum of industries and sectors, including e-commerce, technology, insurance, gaming, manufacturing, consumer products and apparel, and business services. We have developed particular experience within the middle-market, often handling transactions that range between a few million to over one hundred million dollars.

Our team advises on all phases of an M&A transaction, taking a comprehensive approach to guide our clients through complex and challenging issues that may arise. We work collaboratively with both our clients and their advisors, and draw on the experience of our cross-disciplinary team, including the Firm's intellectual property, gaming, employment, real estate, environmental and estate planning practice groups.

Over the years, our clients have praised us for providing outstanding value. We staff our matters leanly and efficiently, seeking to add value whenever possible. This client-focused approach has earned us a Firm ranking within the Mergers & Acquisitions category of U.S. News's *Best Law Firms*.
